BEFORE / AFTER

Same 40,000 transactions.

Two very different month-ends.

Manual vs automated reconciliation,
side by side.

ILLUSTRATIVE VOLUME

blacksailco.com

Matching

BEFORE · MANUAL

Exports pasted into a spreadsheet and matched one lookup at a time.

AFTER · AUTOMATED

Every bank, PSP and ledger line matched at transaction level, including one-to-many.

Exceptions

BEFORE · MANUAL

Breaks sit in a ‘to check’ tab with no owner and no due date.

AFTER · AUTOMATED

Every break lands in a queue with a reason, an owner and a due date.

Visibility

BEFORE · MANUAL

The gap shows up at month-end, weeks after the payout landed.

AFTER · AUTOMATED

An alert the day a payout doesn't tie out.

Journals & reporting

BEFORE · MANUAL

Adjustments typed by hand. Reports rebuilt from scratch each month.

AFTER · AUTOMATED

Journal entries created automatically. Close status visible every day.

Audit trail

BEFORE · MANUAL

Evidence scattered across email threads and file versions.

AFTER · AUTOMATED

Every match, decision and approver logged with a timestamp.

The future of finance isn't more people checking the same data.

It's better infrastructure.

Which side is your team on?

Comment “before” or “after”.
